Can't recommend this enough honestly, and you have 7 days to see if I'm right [] I've just bought this app and it is amazing, it works perfectly, does what it says on the tin literally, and no subscription is the best part, if subscription was ever added I'd thing this app would be ruined but luckily the developers kept it as a 1 time buy. It delivers powerful tools for adjusting exposure, contrast, saturation, and sharpness—while also offering RAW image support and dozens of filters, dust effects, and light leaks. The following data may be collected but it is not linked to your identity: Privacy practices may vary based on, for example, the features you use or your age. However I would like to throw out 1 opinion which may be a bit controversial but I feel a bit limited mainly with the touch tools, of any developer reads this I really hope you could add more touch tools, one could be colour hue and saturation as they are great tools but can't be used in specific areas and effect the entire image. We at Afterlight are passionate about high quality filters, real film textures and precise editing tools, so we created the most complete & easy to use photo editor on mobile. Hopefully the app never sees to be subscription and I'd 100% recommend this app to anyone Yearly Afterlight Membership Monthly Afterlight Membership The developer, Afterlight Collective, Inc, indicated that the app's privacy practices may include handling of data as described below. Subscriptions are billed monthly or yearly with a 7-day free trial. On the move perfection everywhere you go with an easy to use menu that's just flawless. I'd also like to suggest adding a grey scale for the hue, sometimes in pictures I'd like to change the colour of my pants or shirt to black or white, but right now that isn't really possible hopefully this can be added one day. As I said the app is amazing and doesn't drain your battery, but I'd personally would like to see more tools, and better use of the current ones. Your Afterlight Membership can be managed in your account settings on the App Store under your Account > Subscriptions. Check our Terms of Use & Privacy Policy here — Have a question? 7 day free trial to try everything out instead of 3 days like most, and if you don't like it which I very much doubt you cancel before the 7th day and it's not cost you a penny.
